

**REPORT TO THE LEGISLATURE**  
**Pursuant to P.A. 252 of 2014**  
**Article V, Section 612(4)**  
**Parole/Probation Violators**

Sec. 612. (4) The department shall provide annual reports to the senate and house appropriations subcommittees on corrections, the legislative corrections ombudsman, the senate and house fiscal agencies, and the state budget director on the number of all parolees returned to prison and probationers sentenced to prison for either a technical violation or new sentence during the preceding calendar quarter. The reports shall include the following information each for probationers, parolees after their first parole, and parolees who have been paroled more than once:

(a) The numbers of parole and probation violators returned to or sent to prison for a new crime with a comparison of original versus new offenses by major offense type: assaultive, nonassaultive, drug, and sex.

(b) The numbers of parole and probation violators returned to or sent to prison for a technical violation and the type of violation, including, but not limited to, zero gun tolerance and substance abuse violations. For parole technical rule violators, the report shall list violations by type, by length of time since release from prison, by the most recent violation, and by the number of violations occurring since release from prison.

(c) The educational history of those offenders, including how many had a GED or high school diploma prior to incarceration in prison, how many received a GED while in prison, and how many received a vocational certificate while in prison.

(d) The number of offenders who participated in the re-entry program versus the number of those who did not.

(e) The unduplicated number of offenders who participated in substance abuse treatment programs, mental health treatment programs, or both, while in prison, itemized by diagnosis.

Due to the replacement of a legacy data system in the department, this report is currently not available. The necessary data to complete this report is now structured differently than on the legacy data system forcing a complete rebuild of the report. This report will be published when the rebuild process has been completed.
