

2013 West Nile Virus Human Testing Results Final

Legend

 Counties with a positive WNV human case (includes probable and confirmed cases, all clinical syndromes and viremic blood donors)

TOTAL # CASES/DONORS: 38
TOTAL DEATHS (2):

* Please note that negative testing results do not imply safety from WNV infection in those counties.

Produced by MDCH Communicable Disease Division. Map updated as cases identified and testing results become available.

In 2012, there were 202 WNV human cases in Michigan, including 17 fatalities.
