

Division of Accountability Services (DAS) Secure Site Access

Secure Site access is only available to district and school employees who require the information contained on the site as a part of their job. This information is protected by Family Educational Rights and Privacy Act (FERPA).

Each district should have one or more District Administrator level users for the Secure Site. This allows the user to access all student, assessment and accountability data on the Secure Site for the district. In addition, the administrator level user will be responsible for approving system requests for access, adding new users, changing the access of users and inactivating user's accounts as needed for the district. If this is the type of access you require the District Administrator User ID Request form is located at <http://qa.mdoe.state.mi.us/BAASecure/pdfs/BAASecureSiteDistrict.pdf> and will need to be completed by you and the district superintendent and faxed to the DAS office.

If you are a nonpublic school user and need School Administrator Level access, the Nonpublic School Administrator User ID Request form is located at <https://baa.state.mi.us/BAASecure/pdfs/BAASecureSiteNonPublic.pdf> and will need to be completed by the school administrator or principal and faxed to the DAS office.

For all other access to the Secure Site, log into the Secure Site at <https://baa.state.mi.us/BAASecure/Login.aspx> with your MEIS login and password and complete the Request Access page. The administrator of the site will receive a notice that access has been requested and will log on to the Secure Site and approve or deny the user request.

If you do not have a MEIS account or you do not remember your MEIS login and/or password, you can obtain it at <https://cepi.state.mi.us/MEIS/Login.aspx>.

MEIS login and passwords are not to be shared and each user must have their own. If it is known that a MEIS login and password has been shared for the purpose of accessing the Secure Site, both users can permanently lose their access to the Secure Site.
