The LAP Hot Mix Asphalt (HMA) Mix Selection Guidelines have recently been updated, and are now posted on the Michigan Department of Transportation (MDOT) Local Agency Program (LAP) website, at [www.michigan.gov/mdotlap](http://www.michigan.gov/mdotlap).

The guidance was developed at the request of Local Agency engineers for use on federally funded Local Agency projects, and updated to reflect current applications of mix design.

These guidelines have been reviewed and approved by the County Road Association of Michigan (CRA) Engineering Committee, and concurred with by Federal Highway Administration (FHWA) Michigan Section, and MDOT.

This document replaces the previous edition of the guidance, published in 2009.

This guidance takes effect as of August 29, 2016.

To access the document, go to the LAP website. Once on the website, select the LAP unit on the left side of the web page then, once on that page, click on the "Design" link that is in the section headed "Requirements", then scroll down to the section headed "Pavement Selection/Design" and click on the link titled "[Hot Mix Asphalt \(HMA\) Selection Guidance - August 2016](#)".
