

# I-69 Industry Safety and Constructability Review Survey

## Executive Summary:

The first industry safety and constructability review pilot project during design was completed in April 2020 with the I-69 Project. Before piloting another project, MDOT would like feedback on the first pilot project. So below are some questions that MDOT would appreciate input from our Industry partners to improve the process going forward. Please take time to complete the survey.

## Contact:

All survey responses must be made by E-mail to Craig Heidelberg [heidelbergc@michigan.gov](mailto:heidelbergc@michigan.gov) by June 26, 2020. E-mails must include I-69 Pilot Project Survey in the E-mail Title, Name of Commenting Person, Company Name and Phone Number.

## Questions:

1. Was the information provided adequate for you to perform a meaningful review of Work Zone Safety and Constructability?
2. What additional information that could be provided to assist in the review?
3. Would providing a brief summary of challenges discovered during the initial design phase be beneficial?
4. How much time should this type of review be posted for?
  - a. 1 week
  - b. 2 weeks
  - c. 3 weeks
  - d. 4 weeks
5. Are you willing to spend the time to perform a meaningful review on more projects in the future?
6. Are you apprehensive to provide input?
7. What types of projects would this be useful for in the future?
  - a. Major Reconstruct
  - b. Complicated Bridge or Road Reconstruction
  - c. Minor reconstructs with complicated staging
  - d. All projects
  - e. None at all
8. This project included the Project PDF plan set to assist in quickly developing a package for the industry review. What concerns do you have with the project PDF plan set?
