External Access, Process Improvement and RID Requirement Updates

MDOT is continuing implementation of changes to design processes and plan set standards. The process development improvements for ProjectWise External Access and Updated Design Submittal Requirements as part of the Reference Information Documents (RID) Submittal are completed and posted for implementation on the MDOT Development Guide Wiki:

http://michigan.gov/documents/mdot/MDOT_2015-03_ProjectWise_External_Access_482535_7.pdf

http://www.michigan.gov/documents/mdot/MDOT_2015-03_Updated_Design_Submittal_Requirements_482538_7.pdf

The changes include ProjectWise external access and new and updated workflows, right-of-way process improvements, new folder structure, new and updated forms. The changes also include expanding upon the current RID requirements and include three-dimensional (3D) model design and design submittal requirements.

As previously announced, these changes are effective for projects with design commencing after March 1, 2015.
