

## Michigan State Police Criminal Justice Information Systems Administrative Rules Revision Review Sessions

The Criminal Justice Information Systems (CJIS) administrative rules govern the access, use, and disclosure of information in CJIS, including the Law Enforcement Information Network (LEIN), the Automated Fingerprint Identification System (AFIS), and other information systems related to criminal justice or law enforcement. The CJIS administrative rules underwent an extensive revision process that included obtaining input from CJIS business areas, stakeholders, and the user community. The revised rules were effective March 19, 2021.

The LEIN Field Services Unit will be hosting several informational web conference sessions to review the changes and explain what the changes mean for user agencies.

Review sessions will be conducted using Microsoft Teams. Registration is not required. Attendance will be limited to 250 participants per session. Web conference log-in/call-in information is listed below.
