

TRAINING BULLETIN #10

Selecting 'delete' while in a Case Report Narrative

When typing a narrative in a case report, PremierOne will automatically underline a misspelled word in red. Right-clicking on the word gives the user options to correct the error. **Selecting the 'delete' option will delete the entire narrative, not the individual word selected.** Instead of using the delete option shown below to remove an unwanted word from a case narrative, either highlight the word and hit the backspace button on the keyboard or place your cursor at the end of the word and continue hitting the backspace button until the word is gone.

If you have any questions regarding the system, please contact the SRMS staff at:
