Will Brain Imaging Put Neuropsychologists Out Of Business?

on

January 6, 2021

5:00 p.m. - 6:00 p.m.

Location
Webinar

Advancing the Plot: Cognition and Mental State

**At the close of this talk, participants
will be able to:**

- 1. Address the connection between the emotional state and cognition**
- 2. Understand activation of the limbic system and access to the frontal lobe**
- 3. Identify emotional barriers to therapy and when to adjunct psychological services to the team**
- 4. Explore strategies to help consumers get out of their own way in order to make progress in therapies.**

This training will provide practitioners with a deeper understanding of both the connection between cognition and emotional state as well as how these factors impact activation of the limbic system and negatively affect access to the frontal lobe. This talk will also help practitioners identify emotional barriers to therapy, explore their impact on the therapeutic process and identify when to adjunct psychological services. Lastly, this training will explore strategies that will help clients recognize their individual barriers and improve therapeutic outcomes.
