

Michigan Child and Adolescent Health Center FY16 Report Card

SERVICES TO CHILDREN AND ADOLESCENTS		
METRIC	FY 2015	FY 2016
Number of unduplicated clients aged 21 and under	30,434	34,828
Number of physical exams provided	13,489	15,969
Number of immunizations provided	26,337	29,201
Median percent of pregnancy tests that were positive (n=73 CAHCs)	7%	5%
Median percent of chlamydia tests that were positive (n=75 CAHCs)	11%	10%
Number uninsured clients enrolled in Medicaid by the health center	858	950
ADMINISTRATION & REGULATION		
CAHCs reaching 90% or more of Projected Performance Output Measure (PPOM= number of unduplicated users that centers project to reach) (n=76 CAHCs)	65%	59%
Received an “A” or “B” grade at site review (n=21 CAHCs in FY15; n=16 CAHCs in FY16)	100%	100%

PREVENTION AND DISEASE CONTROL			
METRIC (all values represent the median across CAHCs)	FY 2015	FY 2016	Threshold
Percent of clients with:			
An up-to-date, documented comprehensive physical exam, regardless of where exam provided (n=74)	66%	67%	Reasonable Percentage
An up-to-date risk assessment (n=74)	87%	90%	90%
A diagnosis of asthma who have individualized care plan** (n=74)	79%	77%	100%†
A BMI \geq 85th percentile who have evidence of nutrition <i>and</i> physical activity counseling (n=74)	90%	94%	100%†
Current tobacco use who are assisted with cessation (n=65)	85%	100%	75%
An up-to-date depression screen (n=74)	86%	91%	90%
A positive chlamydia test who are treated onsite (n=62)	100%	100%	90%

n = number of CAHCs reporting in FY 2016 (n=78 if not otherwise indicated)

** Action Plan, which includes annual medication monitoring

† As close to 100% as possible, however this may be difficult to achieve with a higher number of cases

Red Bold Font indicates a measurement below the desired threshold

CHILD & ADOLESCENT HEALTH CENTER

FY16 REPORT CARD

Child and Adolescent Health Centers (CAHCs) promote the health of children, adolescents and families by providing important primary, preventive and early intervention health care services. The MDHHS/MDE CAHC Program services are aimed at achieving the best possible physical, intellectual and emotional health of children and adolescents by providing services that are high quality, accessible and acceptable to youth.

SERVICES PROVIDED INCLUDE:

- 📍 Primary Health Care
- 📍 Mental Health Counseling
- 📍 Preventive Care including Immunizations
- 📍 Vision and Hearing Screening
- 📍 Treatment of Acute Illness
- 📍 Co-management of Chronic Illness
- 📍 Referral for Specialty Care
- 📍 Health Education
- 📍 Medicaid Outreach and Enrollment

A key component to measuring value of the CAHCs is the use of a core set of standardized measures to demonstrate effectiveness, efficiency and quality in child and adolescent health care across the state's diverse clinical health centers. Program-wide data collection enables CAHCs to demonstrate quality as well as compliance with national standards. Statewide results are presented on the Michigan CAHC Report Card (see opposite page).

Not all centers had data to report for some metrics (e.g., elementary centers did not conduct pregnancy or chlamydia tests, no clients reported smoking, etc.). Some centers could not report data due to challenges with electronic medical records or other reasons. Three centers were not open for the full year and/or had transition that impacted ability to collect data; therefore, these centers were not included in reporting metrics, primarily in the Prevention and Disease Control Section.

YOU SHOULD ALSO KNOW

Of 21,538 clients who had an up-to-date physical/well-child exam last year, **(74%) received the exam at a CAHC.**

The **percent of clients up-to-date with ACIP-recommended immunizations** is a quality metric measured by CAHCs. Due to a change in FY16 reporting requirements, this data is not included on the Report Card this year to allow review of the data and to establish a new threshold that is aligned with the revised requirement.
