

Tobacco Tax Funds Report

(FY2020 Appropriation Act - Public Act 67 of 2019)

April 1, 2020

Sec. 227. The state departments, agencies, and commissions receiving tobacco tax funds and Healthy Michigan fund revenue from part 1 shall report by April 1 of the current fiscal year to the senate and house appropriations committees, the senate and house fiscal agencies, and the state budget director on the following:

(a) Detailed spending plan by appropriation line item including description of programs and a summary of organizations receiving these funds.

(b) Description of allocations or bid processes including need or demand indicators used to determine allocations.

(c) Eligibility criteria for program participation and maximum benefit levels where applicable.

(d) Outcome measures used to evaluate programs, including measures of the effectiveness of these programs in improving the health of Michigan residents.

MICHIGAN DEPARTMENT OF HEALTH & HUMAN SERVICES

HEALTHY MICHIGAN FUND REPORT

For the Period October 1, 2018 to September 30, 2019

Healthy Michigan Funds are used to support public health activities at the community level. Activities and accomplishments are evidence of positive steps being taken to reduce preventable death and disability in Michigan residents. These local activities have a direct impact on many of the 28 Michigan Critical Health Indicators.

This portion of the Healthy Michigan Fund Report presents highlights of Fiscal Year (FY) 2019 accomplishments for all the Healthy Michigan Fund projects, their indicators of success, along with future goals for FY 2020.

Table of Contents

Summary: Medical Services Match Revenue.....	3
Cardiovascular Health.....	4

**MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES
FY 2019 Medical Services Program Tobacco Tax Report**

Healthy Michigan Fund

In FY 2019, \$24,992,900 of the Healthy Michigan Fund was appropriated as match for Medical Services and leveraged \$45,310,616 in Federal Medicaid dollars to provide health care services to Medicaid beneficiaries.

Medicaid Benefits Trust Fund

In FY 2019, \$354,938,800 of Medicaid Benefits Trust Fund was appropriated as match for Medical Services and leveraged \$643,482,578 in Federal Medicaid dollars to provide health care services to Medicaid beneficiaries.

Health & Safety Welfare Fund

In FY 2019, \$4,814,900 of Health and Safety Welfare Fund was appropriated as match for Medical Services and leveraged \$8,729,123 in Federal Medicaid dollars to support Disproportionate health care services to cover uncompensated hospital costs.

Summary of Medical Services Match Revenue			
Revenue	Total	Tobacco Tax	Federal
Healthy Michigan Fund	\$ 70,303,516	\$ 24,992,900	\$ 45,310,616
Medicaid Benefits Trust Fund	\$ 998,421,378	\$354,938,800	\$643,482,578
Health & Safety Welfare Fund	\$ 13,544,023	\$ 4,814,900	\$ 8,729,123
Total	\$1,082,268,917	\$384,746,600	\$697,522,317

Healthy Michigan Fund – FY 2019 Report

Health and Wellness Initiatives
 Appropriation # - 47000
FY 2019 Funds Appropriated: \$212,300

Chronic Disease Control and Health
 Promotions Administration
 Appropriation # - 35800
FY 2020 Funds Appropriated: \$212,300

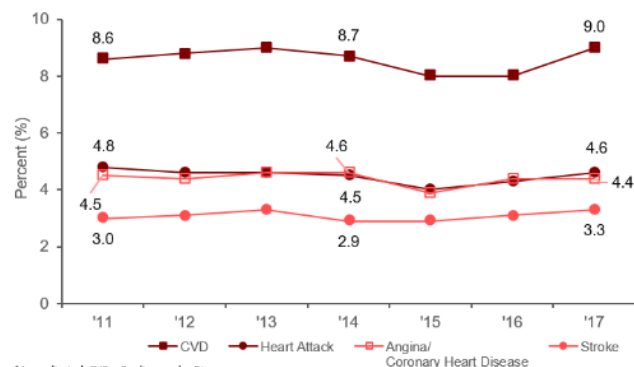

Project Name: Cardiovascular Health

Target Population: Michigan residents with a special emphasis on populations most impacted by causes of health disparities, including low-income and decreased access to services.

Project Description: To prevent and improve the management of cardiovascular disease and its risk factors with a goal of decreasing morbidity, premature mortality, and healthcare costs due to heart disease, stroke, and obesity. Funds support state staff to lead cardiovascular health, physical activity and nutrition programs.

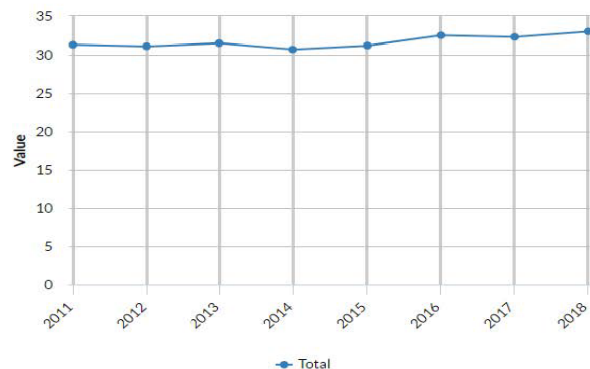

Michigan Trends in Cardiovascular Disease

Figure 1. Cardiovascular Disease among Michigan Adults (18 years and older), 2011-2017^{***}

*Age-adjusted: CVD – Cardiovascular Disease
 **CVD Source: Michigan Behavioral Risk Factor Surveillance System (2011-2017)
 ***Source for Other Diseases: Behavioral Risk Factor Surveillance System, CDC (2011-2017)

Michigan - All available years
 Percent of adults aged 18 years and older who have obesity †
 View by: Total

Footnotes

† Obesity is defined as body mass index (BMI) ≥ 30.0; BMI was calculated from self-reported weight and height (weight [kg]/height [m²]). Respondents reporting weight < 50 pounds or ≥ 650 pounds; height < 3 feet or ≥ 8 feet; or BMI: < 12 or ≥ 100 were excluded. Pregnant respondents were also excluded.

Heart Disease and Stroke Prevention:

The work in heart disease and stroke prevention is focused on two major project areas:

- Advancing the Michigan Million Hearts® goal of preventing 108,000 heart attacks and strokes by 2022 through health system interventions, promoting team-based care, and establishing community-clinical linkages to prevent and control high blood pressure and high blood cholesterol.
- Building stroke systems of care to improve outcomes for stroke patients through quality improvement initiatives, including linking stroke data across pre-hospital, emergency medical services (EMS), in-hospital and post-discharge transition of care settings.

Outcomes:

- Nearly 30,000 heart disease and stroke prevention education resources were sent to Michigan primary providers, health systems and the public.
- There were 965 hits to the Michigan Million Hearts® website. This website serves as a platform for resources and a connection for all stakeholders interested in supporting and implementing Million Hearts® strategies.
- Michigan’s Ongoing Stroke Registry to Accelerate Improvement of Care (MOSAIC) Program increased partners from 36 to 42 hospitals and initiated partnerships with 9 Medical Control Authorities (MCAs) to improve quality of care for stroke patients as part of the state stroke registry and quality improvement program.
- Within stroke registry participating hospitals, 76% of patients receive defect-free stroke care, that includes all the appropriate treatments and education.

Obesity Prevention:

- The adult obesity prevalence in Michigan has remained relatively stable over the past eight years, from 31.3% in 2011 to 33.0% in 2018. Based on Healthy People 2020 target, Michigan aims to:
 - Reduce adult obesity rates to 29.2% by 2026.

Project Name: Cardiovascular Health - continued

- Implement strategic public health efforts aimed at increasing the number of policies and standards in place to support physical activity and healthful eating, increasing access to and use of environments to support healthful eating and physical activity, and increasing the number of social and behavioral approaches that complement policy and environmental strategies to promote healthful eating and physical activity.

Outcomes:

- Staff provided technical assistance on creating healthier school environments through evidence-based, school-wide initiatives that support children's health and youth engagement in before/after school and summer programming. These initiatives were implemented in 210 schools and 60 YMCAs and community sites and impacted 60,500 students.
- Staff coordinated a recognition program for Michigan businesses to encourage implementation of worksite wellness best practices and recognized 6 businesses for implementing new work environment policies, practices and programs. Fifty-five more businesses were recognized with an honorable mention award for activating their improvement process by taking the worksite wellness assessment.
- The Michigan Department of Health and Human Services (MDHHS) continued to provide training, technical assistance and resources to businesses across the state to develop worksite wellness programs. The number of worksites adopting worksite wellness programs, including policies, increased from 149 to 167 reaching over 42,000 employees.
- Policy and environmental changes were implemented in communities to increase physical activity opportunities for over 156,674 individuals.

NOTE: Cardiovascular Health - Healthy Michigan Funds were used internally to provide support for programming described above. Funds were not allocated outside of MDHHS.

Health and Wellness Initiatives
 Appropriation # - 47000
FY 2019 Funds Appropriated: \$203,700

Minority Health Grants and Contracts
 Appropriation # - 54850
FY 2020 Funds Appropriated: \$226,200

Project Name: Office of Equity and Minority Health (previously known as the Health Disparities Reduction and Minority Health Section)

Target Population: Michigan’s racial and ethnic minority populations: African American, American Indian/Native American, Arab American/Chaldean, Asian American/Pacific Islander and Hispanic/Latino.

Project Description: The Office of Equity and Minority Health (OEMH) is committed to eliminating racial and ethnic health disparities through implementing and/or funding culturally appropriate, evidence-based approaches to achieving health equity for all Michigan residents.

Project Accomplishments for FY 2019:

- Funded Intertribal Council of Michigan (ITCM) and Kent County Health Department (KCHD) (October 2018 – September 2020) to improve data access and availability for minority populations.
- ITCM coordinated a Behavior Risk Factor Survey with three of Michigan’s federally recognized tribes. There were 563 surveys completed.
- ITCM produced an aggregate Behavioral Risk Factor Survey report of their surveying of the 3 federally recognized tribes.
- KCHD surveyed residents to better understand the barriers to home ownership and housing health and safety issues. Six community members trained in survey administration and collected 413 surveys completed.
- Completed 2018 Health Equity Report and submitted to the Michigan legislature. A legislative breakfast to review the report was held with close to 100 internal and external stakeholders. The report included cross cutting, collaborative initiatives that address racial and ethnic minority health and social equity involving various partners within and outside of MDHHS. The report included data briefs on Hepatitis B, Youth Violence and Infant Mortality.
- Conducted ongoing monitoring for six organizations funded to increase their capacity to implement minority health and health equity initiatives that focused on violence prevention. A comprehensive report outlined program outcomes for each of the six funded organizations.
- Collaborated with the department’s Diversity, Equity and Inclusion Training and Professional Development action team in co-developing and official issuing of the APR-500 DEI Training Policy. APR-500 mandates that all staff complete two online trainings: 1.) Introduction to Health Equity and 2.) Systemic Racism. During FY 2019, we reported a total of 1,288 Introduction to Health Equity completions including internal MDHHS staff, Michigan Public Health Institute (MPHI) staff and the public. Systemic Racism was designed and developed in FY 2019 and officially published in January 2020.

Project Name: Office of Equity and Minority Health - continued

- Inside Our Mind: Hidden Biases was piloted in FY 2019. Official launch of this workshop occurred in June 2019. During 2019-2020, a total of 4 workshops were completed at MDHHS with 118 participants. Four workshops were completed with the OEMH's capacity building grantees, with a total number of 87 participants.
- OEMH co-developed, strengthened and led the implementation of a Facilitator Endorsement Process with cohort 1 of facilitators-in-training. This process is used to train new workshop facilitators. From February 2019 to February 2020, participants spent a total of 55-80 hours in the process.

Healthy Michigan Fund – FY 2019 Report

Health and Wellness Initiatives
 Appropriation # - 47000
FY 2019 Funds Appropriated: \$2,103,300

Immunization Program
 Appropriation # - 48700A
FY 2020 Funds Appropriated: \$2,184,800

Project Name: Immunization: The Michigan Care Improvement Registry and Administration (MCIR)

Target Population: All residents of Michigan

Project Description: MCIR is a regionally based, statewide web-based program that contains over 149 million shot records of over 10.5 million people, primarily children under the age of 20 years. The MDHHS is currently working, through subcontracts, with six MCIR regions to enroll and support every immunization provider in the state. Currently there are 6,535 immunization providers/healthcare organizations enrolled in MCIR, 4,142 schools and 3,943 childcare programs. MCIR processes over 2.6 million queries monthly from provider Electronic Health Records (EHR) systems to supply patient immunization history and forecast information directly to their EHRs. Approximately 81% of vaccine submissions are sent to MCIR directly from EHRs using Health Level Seven International Standard (HL7) messaging. Use of HL7 electronic messaging is the contributing factor for the improvement of adult immunization administration information in MCIR. Over 1.2 million vaccinations in 2019 were entered on the MCIR web application where pediatricians and general/family practice providers have access to view immunization history and forecast information but also available is the latest Blood Lead, Newborn Hearing and Newborn Screening (blood spot) test results, as well as Medicaid Early Periodic Screening Diagnostic Test (EPSDT) results and due dates.

Project Accomplishments for FY 2019:

- Continued bi-directional data exchange (Query) between MCIR and providers EHR systems that averaged over 2.6 million hits monthly, or about 87,000 hits daily. Query is used by both immunizing and non-immunizing providers (e.g. specialists).
- Implemented a standardized vaccine forecasting (vaccines due) tool within the MCIR system for Influenza.
- Implemented pilot parent (consumer) access to child’s MCIR record using Query via a school districts Secure-Parent-Portal.
- Implemented State-to-State immunization registry sharing of vaccination records with Wisconsin and North Dakota (to obtain resident vaccination information who received them in other state).

MCIR Historical Perspective of Registered Users and Shots Recorded

Year	Register Users	Doses Entered
1997	137	None
1998	1,327	6.5 million
1999	2,007	5.5 million
2000	2,333	4.4 million
2001	2,815	8.3 million
2002	3,493	5.5 million
2003	4,242	4.8 million
2004	7,459	2.6 million
2005	19,759	2.7 million
2006	23,000	5.3 million
2007	26,638	6.4 million
2008	23,790	7.3 million
2009	29,020	7.9 million
2010	28,445	8.4 million
2011	29,073	7.2 million
2012	30,070	7.3 million
2013	30,779	7.6 million
2014	26,140	7.8 million
2015	27,264	8.4 million

2018	31,784	9.1 million
2019	33,085	9.7 million

Health and Wellness
 Appropriation # - 47000
FY 2019 Funds Appropriated: \$50,000

Prenatal Care Outreach & Service Delivery
 Support
 Appropriation # - 58900
FY 2020 Funds Appropriated: \$50,000

Project Name: Nurse Family Partnership Project

Target Population: First-time, low-income mothers and their infants in nine communities: the cities of Detroit and Pontiac and the counties of Berrien, Calhoun, Genesee, Ingham, Kalamazoo, Kent and Saginaw.

Project Description: The disparity in infant and maternal mortality is a major public health issue in the state of Michigan. Improving Maternal and Infant health is one of MDHHS’ priorities and the Mother Infant Health Equity Improvement Plan recognizes home visiting as a key strategy to improve maternal and infant health.

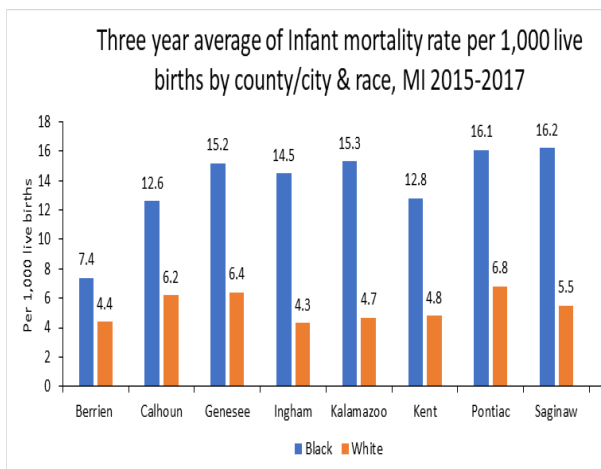

Nurse-Family Partnership (NFP), one of several home-visiting models in the state, is an evidence-based, nurse home visitation program that aims to improve the health, well-being and self-sufficiency of a first-time, low-income mother and her infant.

www.nursefamilypartnership.org.

In FY 2019, \$50,000 was used to assure continuation of NFP services in Genesee County.

Project Accomplishments for FY 2019:

- During FY 2019, Hurley Nurse-Family Partnership served 261 women and 206 children while continuing to implement NFP with fidelity and to comply with all requirements of the Michigan Home Visiting Initiative (MHVI) and PA 291 of 2012.
- 74.6% of Hurley Nurse-Family Partnership clients initiated breastfeeding and the Hurley NFP team was successful in increasing breastfeeding duration rates at 6 months from 29.8% to 31.3% and at 12 months from 4.8% to 18.2%.
- Premature births decreased from 14.1% to 8.5%.
- Ninety percent of Hurley NFP babies were up to date with immunizations at 12, 18 and 24 months.
- Hurley NFP was able to increase their children who received their last recommended well-child visit from 40.1% to 81.9% in FY 2019
- Smoking among clients at 36 weeks gestation decreased from 7.4% to 4.6%.
- Hurley Nurse-Family Partnership Families decreased their percentage of subsequent pregnancies at 6 months from the previous year from 6.9% to 1.8%, at 12 months from 15.1% to 11.5%, at 18 months from 32.4% to 20.9% and at 24 months from 38.1% to 28.6%.

Healthy Michigan Fund – FY 2019 Report

Health and Wellness Initiatives
 Appropriation # - 47000
FY 2019 Funds Appropriated: \$112,500

Pregnancy Prevention Program
 Appropriation # - 58850
FY 2020 Funds Appropriated: \$112,500

Project Name: Pregnancy Prevention

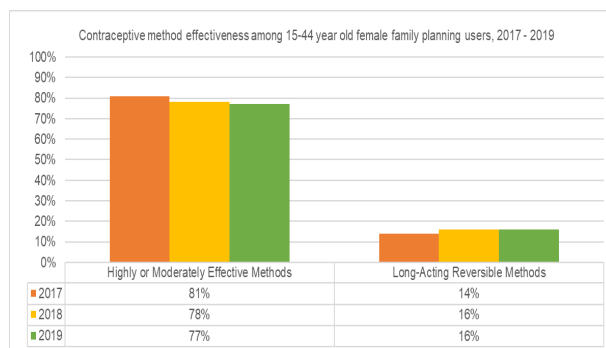

Target Population: Adolescents and their parents/guardians/trusted adults and low-income women and men of childbearing age.

Project Description: Taking Pride in Prevention (TPIP) is a comprehensive pregnancy prevention program designed to educate adolescents on both abstinence and contraception to prevent pregnancy, sexually transmitted infections (STIs) and human immunodeficiency virus (HIV), and incorporates the following three adulthood preparation subjects, which support their successful transition to adulthood: 1) healthy relationships; 2) adolescent development; and 3) parent-child communication. TPIP programming is strengths-based; promotes positive youth development, personal respect, and responsibility; builds skills for dealing with peer pressure; and empowers young people to make informed decisions related to sexual health and pregnancy prevention.

The Michigan Family Planning Program assists individuals and couples in planning and spacing births, preventing unintended pregnancy, and seeking preventive health screenings. The program's strong educational and counseling component helps reduce health risks and promote healthy behaviors. Family Planning prioritizes serving low-income women and men. The Michigan Family Planning Program serves as a safety net with service providers who have been a reliable and trusted source of care, and in many cases the only regular source of health care for individuals. Referrals for medical, behavioral, and social services are provided to clients on an as needed basis. No one is denied services based on inability to pay.

Note: Live birth rates are per 1,000 women per year. Data Source: 2009-2018 Michigan Resident Birth Files, Division for Vital Records & Health Statistics, Michigan Department of Health & Human Services.

Note: 2019 data is preliminary. Method effectiveness determined by Office of Population Affairs (OPA). Report Source: OPA Clinical Performance Measures of Contraceptive Care. Data Sources: Michigan Family Planning Annual Report 2017 - 2019, Michigan. Statistics represent total clients served in Michigan's Family Planning Program.

Project Accomplishments for FY 2019:

Healthy Michigan Funds were used to supplement Personal Responsibility Education Program funding in the following ways:

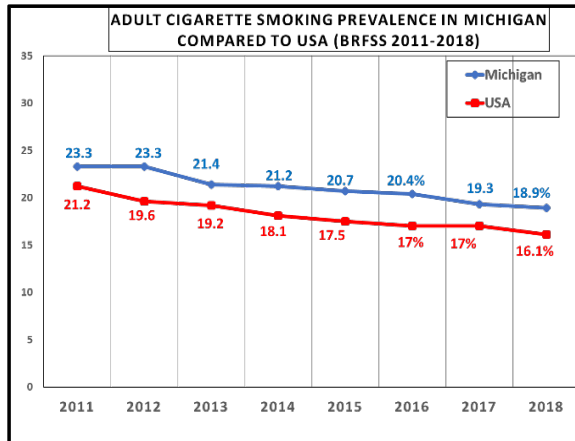

- Supported evidence-based teen pregnancy prevention programming for 2 subrecipients in 9 sites (11 cohorts).
- Provided 240 young people with comprehensive teen pregnancy prevention and adulthood preparation programming.
- Provided 38 parents/guardians/trusted adults with programming focused on improving parent-child communication around abstinence and sexual health.

Healthy Michigan Funds were used to supplement Title X funding in the following ways:

- Supported high-quality family planning services for 31 sub-recipients and 91 clinics across the state.
- Enabled 38,030 individuals living $\leq 150\%$ of the federal poverty level to receive no or low-cost services.
- Afforded 32,764 women a highly effective reversible or moderately effective form of contraception.

Health and Wellness Initiatives
 Appropriation # - 47000
FY 2019 Funds Appropriated: \$1,631,500

Smoking Prevention Program
 Appropriation # - 64400
FY 2020 Funds Appropriated: \$1,631,500

Sources: 2018 MiBRFSS*, 2017 Youth Risk Behavior Survey**, MI Tobacco Quitline reports; Sortable Risk Factors and Health Indicators-CDC; Smoke-free Environments Law Project. MDHHS-Evaluation

Project Name: Smoking Prevention Program

Target Population: All residents of Michigan, highest priority focused on populations disparately affected by tobacco use [youth, adults, seniors, people living with HIV, lesbian, gay, bisexual, and Queer (LGBTQ), and communities of color].

Project Description: Through statewide and community-based grants the Michigan Tobacco Control Program (TCP) funds various agencies (local health departments, community agencies, health systems) to reduce the health and economic burdens of tobacco-related death and disease. The focus areas of our work are increasing the number of smoke-free environments, preventing teens and children from starting to smoke and use e-cigarettes, assisting hard-to-reach populations in quitting smoking, and reducing tobacco use among people who are disparately affected by tobacco use and industry marketing.

Project Outcomes for FY 2019:

Preventing Youth Tobacco Initiation:

- High school students in Michigan used tobacco at 22.8% in 2017 compared to 19.5% for the United States average. The 2019 Youth Risk Behavior Survey results have not been released yet. To address this rate of tobacco use including the youth e-cigarette epidemic, the TCP engaged in the following work:

Preventing Youth Initiation Outcomes

- Worked with schools on tobacco-free policies. Over 91% of school districts have policies stronger than the Michigan Tobacco Free Schools Act. More than 70% of school districts adopted comprehensive 24/7 tobacco-free policies on-campus and off-campus school-sponsored events.
- Began a statewide, monthly e-cigarette workgroup call to update partners across the state on various e-cigarette related activities in Michigan, providing education, new resources and partner sharing of community work to reduce e-cigarette use by youth and young adults as well as prevent initiation and exposure to secondhand aerosol.
- Membership has increased to over 120 partners who represent many types of organizations, school districts and agencies that work with youth. State level partners include the Michigan Department of Education; Office of Recovery Oriented Systems of Care; Michigan High School Athletic Association; Child and Adolescent Health Centers; Michigan Athletic Trainers; School Community Health Alliance of Michigan; Asthma Initiative of Michigan; Oral Health Coalition; Black

Project Name: Smoking Prevention Program – continued

Caucus Foundation; Injury Prevention; School Nurses, Regional School Health; Academy of Pediatrics; Prevention Network and the Michigan Higher Education Network.

- In collaboration with organizations serving disparately impacted youth, disseminated youth-developed messaging to address the youth e-cigarette epidemic throughout Michigan.
- Staff presented 51 times on e-cigarettes at various conferences and meetings including Michigan State University and University of Michigan athletic staff and trainers; state tobacco coalitions; dental hygienist organizations; Ottawa County Board of Commissioners; physician conferences; Michigan Association of Superintendents and Administrators; Mi Regional School Health Association; Michigan Athletic Trainers Association; Michigan Association of Local Public Health and many others.
- Collaborated with several organizations (e.g. Asthma Initiative of Michigan, Michigan High School Athletic Association, Alliance of Coalitions for Healthier Communities, etc.) to create e-cigarette fact sheets to educate Michigan residents on the dangers of youth and e-cigarette use and promote the new My Life My Quit youth quit vaping/tobacco program.
- Provided social media examples to partners to educate communities on preventing youth initiation from reputable organizations such as the Food and Drug Administration (FDA), Centers for Disease Control and Prevention (CDC), Campaign for Tobacco Free Kids, Surgeon General and the Truth Initiative.
- Worked with communities disparately affected by tobacco to utilize social media platforms to post messages on youth use of tobacco and include messaging in community newsletters and newspapers specific to their populations to educate youth and parents, prevent youth from initiating tobacco products and assist youth who are using tobacco products including e-cigarettes.
- Partnered with Michigan Department of Education resulting in adoption of a 24/7 comprehensive model tobacco free school model policy by the State Board of Education. The State Board of Education communicated this new policy to all Michigan public and charter schools.
- Created curriculum and provided two master train-the-trainer programs to youth prevention staff to increase the number of community education presentations on youth tobacco use including e-cigarettes. The outcome is 61 additional trained professionals with consistent materials who provide presentations to schools, school staff, parents and the community to reduce rates of youth initiation and helping young people quit tobacco products.

Smoke Free Air Outcomes:

- After 8.5 years of monitoring Michigan's Smoke Free Air Law (Public Act 188 of 2009), compliance for food establishments has increased as violations and citations continued to decrease from 1,233 in FY 2011 (first year) to 101 in eighth year (FY 2019) of the law.
- Continued to oversee the annual review/renewal of cigar bar and tobacco specialty retail store exemptions, in addition to monitoring compliance with the law to reduce negative health outcomes from secondhand smoke.
- Expanded collaboration with local health departments, law enforcement (both City Police and County Sheriff), and Michigan State Police for enforcement of Public Act 188 of 2009.
- Michigan State Police and TCP collaboration for 2019 versus 2018 realized a 139% increase in citations written, a 147% increase in violations observed, and a 149% increase in fines received.
- Continued to work on increasing the number of smoke-free multi-unit housing properties to prevent secondhand and thirdhand smoke.

Healthy Michigan Fund – FY 2019 Report

- In August 2018, the U.S. Department of Housing and Urban Development (HUD) required all public housing commissions (PHCs) nationwide to implement a smoke-free multi-unit housing policy compliant with the HUD Smoke-Free Public Housing Rule.

Project Name: Smoking Prevention Program – continued

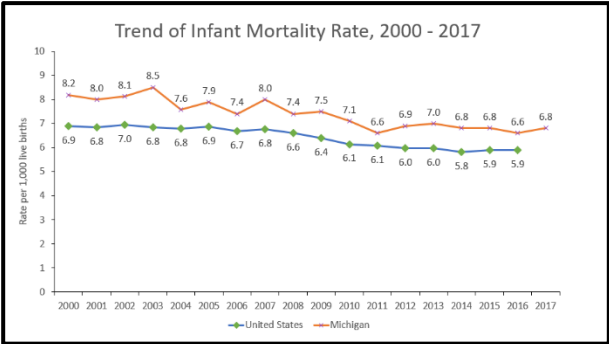

- The TCP, local contractors, and the University of Michigan Smoke-Free Environments Law Project (SFELP) continue to provide technical assistance and support to PHCs to ensure compliance with the HUD rule in Michigan. Provided resources to PHC staff and residents interested in quitting smoking, resulting in PHC residents utilizing the Michigan Quitline services to aid in their transition to smoke free housing.
- Supported affordable and market rate multi-unit housing properties with smoke-free policy adoption.
- The TCP and local partners continue to increase tobacco-free outdoor policies to reduce the impact of secondhand smoke on Michigan residents. This work resulted in 59 tobacco-free and/or smoke-free parks or beach policies implemented by local jurisdictions in Michigan and 26 local jurisdictions have adopted park and/or beach policies with smoke-free or tobacco-free designated areas.

Tobacco Cessation Outcomes:

- Reduced the adult smoking rate from 23.3% in 2011 to 18.9% in 2018.
- Michigan's Tobacco Quitline continues to provide ongoing training and outreach to health clinics and health care providers to increase the number of Michigan residents who use tobacco products to engage in cessation.
- 74 pregnant smokers called the Quitline to quit tobacco use; 8,403 Michigan residents enrolled in the Quitline; the six-month overall abstinence rate with the Quitline is 28%.
- Launched a new youth Michigan Quitline service called My Life My Quit starting in July 1, 2019 which offers free and confidential coaching services to assist youth 17 years and under who use tobacco products, including e-cigarettes, to stop. This program can be offered by school districts as an alternative to suspension to address youth addicted to tobacco products including e-cigarettes while maintaining academic success of these students as well.

Health and Wellness Initiatives
 Appropriations # - 47000
FY 2019 Funds Appropriated: \$985,800

Family, Maternal and Children’s Health
 Services Admin Appropriation #43000
FY20 Appropriated \$157,600
 Pregnancy Prevention Program App
 #58800
FY20 Appropriated \$750,000

Note: Infant mortality is defined as a death of a baby his/her first birthday and is expressed as a rate per 1,000 live births. Data Source: Centers for Disease Control and Prevention, National Center for Health Statistics; Michigan live birth files, and infant mortality files: Division for Vital Records & Health Statistics.

Note: Infant mortality is defined as a death of a baby his/her first birthday and is expressed as a rate per 1,000 live births. Data source: Michigan resident live birth files, and infant mortality files; Division for Vital Records & Health Statistics, MDHHS.

Project Name: Family, Maternal and Child Health

Target Population: All Michigan residents with focus on infants, pregnant women, women of childbearing age, communities of color, adolescent parents and their parents/guardians, and low-income women and men.

Project Description: Maternal and infant mortality rates are key indicators of the health and wellbeing of families, mothers, and children. Healthy Mom and Healthy Babies is a key priority of Governor Whitmer’s administration. Michigan infant mortality data highlights three areas of concern: higher rates than the national average; alarming disparities existing between racial and ethnic groups; and disproportionate poor prenatal outcomes in low income populations. To reduce maternal and infant mortality rates and disparity, a comprehensive, targeted, data-driven approach is being utilized. The approach includes readily available contraception and reproductive health services, and a comprehensive program designed to address the needs of pregnant and parenting adolescents.

Project Accomplishments for FY 2019:

- Implementation of the Mother Infant Health and Equity Improvement Plan (MIHEIP), 2020-2023. See: https://www.michigan.gov/documents/infantmortality/FINAL_MIHEIP_665052_7.pdf and https://www.michigan.gov/documents/infantmortality/FINAL_MIHEIP_Appendices_665053_7.pdf. This plan is the new iteration of what was formerly known as the Infant Mortality Reduction Plan.
- Supported client-centered contraception and reproductive health services for 30 sub-recipients in 93 clinics across the state and served 54,981 women and 7,726 men.
- Performed cervical cancer screenings based on national clinical standards of care on 7,473 women with over 1,232 women referred for further care due to abnormal screening.
- Performed 35,346 chlamydia tests, 39,001 gonorrhea tests, and 16,005 HIV tests.
- Provided case management or support services through the Michigan Adolescent Pregnancy and Parenting Program (MI-APPP) to 251 pregnant and parenting teens.
- Provided support services by MI-APPP to improve familial connection and communication to 150 parents/guardians of teen parents.

Drinking Water Declaration of Emergency

FY 2019 Funds Appropriated: \$376,600
FY 2020 Funds Appropriated: \$0

Lead Investigations and Abatement in Flint, Michigan FY 19 (All Funding)

Project Name: Healthy Homes – Lead Safe Home Program (LSHP)

Target Population: Child occupied facilities, families who reside in a target area and have a child under the age of nineteen or pregnant female residing in the home, or families with a child that has an elevated blood lead level (EBL). Flint is a primary target area for this program.

Project Description: This program provides lead inspections and environmental lead investigations for families with children that have elevated blood levels. Services covered include lead inspections, lead abatement, relocation of the family and follow-up as well as educational material. Other funding sources utilized for the Lead Safe Home program are HUD, General Funds and Medicaid Children’s Health Insurance Program (CHIP). Lead abatement activities are performed by state of Michigan certified Lead Abatement Contractors and are awarded through a competitive bidding process.

Flint-specific Project Accomplishments for FY 2019:

759 Flint households contacted for program enrollment through partnership with Genesee Health System

240 EBL investigations and Lead Inspection Risk Assessments performed on Flint homes.

223 Flint homes sampled for lead in water.

148 Flint homes abated and completed through the LSHP. 98% of these Flint homes were abated with Medicaid CHIP funding, while the remaining were abated with Flint Supplemental or General Fund.

Flint homes made lead-safe for 150 residing children and 113 adults.

188 Flint homes in progress for lead hazard control work.

Continued work with the Genesee County Land Bank Authority to perform lead abatement and general code renovation on a select inventory of vacant properties. These lead-safe and code-updated homes will then be sold at market value to low- and moderate-income families.

Long Term Care Services
Appropriation # - 51950
FY 2019 Funds Appropriated: \$24,992,900

Long Term Care Services
Appropriation # - 51950
FY 2020 Funds Appropriated: \$27,492,900

Project Name: Long Term Care Services (LTC)

Target Population: Medicaid eligible population that meet the nursing home level of care need.

Project Description: This program provides services to many of the state's most vulnerable citizens. Medicaid, as the primary payer for beneficiaries who reside in nursing homes and county owned medical care facilities, adheres to all state and Federal regulations that govern care provided in these facilities. There are eligibility factors used to determine who qualifies for this service. Eligibility depends on age or disability, income, the value of certain assets owned, and the amount of long-term care expenses.

Project Accomplishments for FY 2019: In FY 2019, there were approximately 24,000 Michigan residents that benefitted from these services.
