APPLICATION:

Capital Requests

- Submit four years of capital requests; for planning purposes, FTA requires four years of capital requests be applied for. Out years (not the application year), do not need to be formal requests and can be revised in the application year. Agencies in an MPO region should only include capital requests reasonably expected to be funded. Include all continuation operating funding.
- Confirm all items being requested from replacements are eligible based on useful life of age and/or miles; enter the justification of eligibility and vehicle number in the comment box for each capital request.
- Select the correct funding source (program) from the drop-down list in the application. Most capital requests for rural agencies will fall under 5339 – bus and bus facilities funding; and 5307 for urbans. Choose STBG(STP) for Rural Task Force and Small Urban projects. 5311 capital should only be used if moving a portion of 5311 operating to capital. 5310 funding is used primarily for non-profit agencies providing specialized services, but may also be distributed by OPT to rural agencies with substantial senior/disabled trips.
- Select the dollar amount and vehicle type under Vehicle Purchase Request Form section. Agencies that have a set dollar amount of funding should use the Local button instead of the Extended Purchase button and enter in the exact amount getting funded through Rural Task Force, CMAQ or Small Urban projects in an MPO area.
- If applicable, ensure that requested projects match JobNet.
- Any vehicles being requested for replacement for the first time in the application year, go to Vehicle Inventory under the Financials tab and fill in ‘Replacement Requested’ (VRR) for the application year ONLY. *Example: For the FY2023 application, “2023” will be entered for VRR for any vehicles that this is the FIRST year the agency is requesting replacement for that vehicle. DO NOT CHANGE any previous year VRR fields.*
